

Road Committee meeting 8/14/25

Present: Carl Drew, Troy Drew, Mike Tamaska    Absent: Isabelle Stafford

Guest: Steve Dupuis (Selectman)

Meeting called to order 6:30pm

No minutes available for approval from the previous meeting

Discussion ensued on the proposal to conduct shim repairs to South Chatham road, the committee agreed to move ahead with that repair and seek quotes, the selectboard also agrees with this

Discussed contacting Rob Prue to attend the next Road committee meeting to give an update on the Kezar lake road engineering, agreed to ask Belle to reach out to him and see when he can meet.

Committee discussed and agreed the proposal from the selectboard on entering into a general service agreement with Sebago Technics to begin the general evaluation of the town's roads. Steve Dupuis will contact Jim Seymour to get that started.

We will need to find a company to conduct emergency service on the roads should it be needed. It was mentioned that A.J. Colman's was possibly willing.

The next road grading was weather dependent as rain was needed to make conditions better for that to happen

It was mentioned that grade stakes were needed to mark all of the culverts on town roads, Steve will make that motion for purchase at the next selectboard meeting.

Meeting adjourned 7:35pm

Respectfully submitted by: Steve Dupuis
